

## DL.2 v1.2.1 Release Notes

April 10, 2006

DL.2 v1.2.1 is a feature release for the DL.2 Fixture.

There are two software components, the Content Management Application (CMA) Client and the .dl2 upgrade package for the fixture itself. Installation of the latest CMA Client Software should always be done prior to initiating an upgrade of the fixture using the .dl2 package.

The current version of the User Manual along with the Software is available at:

After updating, the Versions reported should be:

- *Software Version:* 1.2.1.794
- *Firmware Version:* 1.2.1.60
- *Windows XPe:* 1.0.x

### **New Features in v1.2.1:**

- Added Support for 17 flavors of NTSC, PAL, and SECAM video standards for the External S-Video input.

*Note:* Currently, changing the video input requires a reboot of the Graphics Engine for the new setting to take effect. Also, when using the camera set to Internal mode, the video input setting must be set to NTSC\_M.

- Speed of Pan/Tilt motion has been substantially increased over previous versions.

**Bugs Fixed in v1.2.1:**

- 9196 Enable the Windows CMA to use .NET Framework 2.0
- 9093 Pin hole leak in iris sometimes present
- 9092 Full Screen Error messages should override display off
- 9082 Pan operation is greatly slowed on some units after position home from 50/50
- 9148 Increase speed of accelation and maximum velocity without misstepping during can-can type movements.

### **Known Issues in v1.2.1:**

- Images can be slow to load the very first time they are called up, especially with multiple layers running (#7760).
- Rapid changing of images/videos for hours causes memory leak (#7660).
- Deploying Large Content Archives ~8GB or Archives with individual files >1GB may fail (#6407)
- Some Routers with no WAN connection may prevent CMA from communicating correctly. (#8099). The workaround is to not use a router or to provide a WAN connection to the router. Upgrading the Router firmware has also solved the problem in some situations.

### **New Features in v1.2.0:**

- Additional Warning/Error messages added to the system for the Air Filter.
- The need to calibrate the Air Filter has been removed.
- Major re-work has been done to improve the motion performance and reliability. *For Optimal performance the Pan/Tilt motors should be recalibrated from the Menu.*
