

# Wholehog v3.1.2 Release Notes

Version: 3.1.2 (2697) December 22, 2009

Wholehog 3 Console and Rack Mount, Hog 3PC, Road Hog Full Boar, Hog iPC, Road Hog

**Notice:** Version 3.1.x software has a known defect that can cause a DP2000 to freeze. While the occurrence of this defect does not affect all shows, we recommend users of DP2000 systems utilize version 3.0.5 for reliable system stability. We expect to resolve this defect in a timely manner with an upcoming software update. Version 3.0.5 is available for download on the Flying Pig Systems website.

**Version 3.1.2 software is reliable for all systems not using DP2000s and should be considered show safe on all platforms.**

## Wholehog v3.1.2 (Build 2697) Bug Fixes

- 4924 Effect Time x does not add timing to FX
- 8671 Inplace edit of fan offset looks at console numbers not fixture selection
- 9567 CMY channels jump values during long HS colour fades
- 9770 CMY channels jump values when fading HS using an IPCB scene or Manual Xfader
- 9186 HS release type fades snap to white and don't follow any paths correctly
- 9344 Output colors changing when in blind
- 9583 Highlight has to be disabled and reasserted following edits to CMY/HS
- 9770 CMY channels jump values when fading HS using an IPCB scene or Manual Xfader
- 10083 HS cross-fades jump to end values when paused
- 10438 Can't apply open white HS colour palette
- 10459 Cue state changes unexpectedly after update
- 10517 Hue effect with size >360 takes fixtures to white
- 10639 Pressing Colour should front HS picker and gel picker
- 10810 HS Highlight palette will not override CMY values.
- 11039 HS release, back, and out timings are completely ignored
- 12796 LEDs flash white during certain HS cross-fades
- 13147 GM and GL Comment macros on time-coded cues are unreliable
- 13178 Track not forwards not working properly for cues inserted at the beginning of the list
- 13182 Inplace fanning applies entire fan across multiple columns
- 13184 Inplace edit with fanning does not follow the cell selection order
- 13185 Inplace edits with fanning are following fix num and not cell selection order when not all fixtures in editor are part of the fan
- 13187 List and scene directories sometimes not showing releasing lists on page changes
- 13194 Can not single click on a 'Number Cell' to highlight it
- 13195 Remote Task when Replicate on certain shows
- 13196 Fatal Error when running abusive windows open/close tests
- 13201 Driver support for the latest revision of IO Gear USB to VGA adapter
- 13204 Follow cues will not follow any faster than 2s
- 13208 Auto-update with track backwards and not forwards does not work properly
- 13212 iPC with Asus P4P 800-VM motherboard blue screening during Hog3PC upgrades
- 13213 Application support for the latest revision of IO Gear USB to VGA adapter
- 13216 Spread sheet columns should remain visible after sorting if aggregation is turned off for that spreadsheet.
- 13215 Selecting fixture and hitting time button will lockup the desktop

13220 Inplace edit with fanning has odd results when cells were selected by double clicking column header
