## Hog 4

### Features:
- **10 Motorized Faders**
- **10 Motorized Encoders**
- **8 17" Screens**
- **4 15.6" Screens**
- **2 22" Screens**
- **1 12.1" Screen**
- **1 7" Screen**
- **2 White/Blue Worklights**
- **USB DMX Super Widget**
- **USB MIDI/LTC Widget**
- **HogNet**
- **User Keys**
- **Front Worklight**
- **Desk Lights**
- **DMX Processor**
- **LTC & MIDI I/O**
- **Backlit Trackball**
- **Integrated Touchscreens**
- **External Touchscreens**
- **Dedicated Grandmaster & DBO**
- **Onboard DMX-512 Outputs**
- **Onboard Output Processing**
- **Integrated Touchscreens**
- **Encoder Wheels**
- **Road Hog 4**
- **HedgeHog 4X**
- **HedgeHog 4**
- **Hog 4 PC with Hoglet 4**
- **Master Wing 4**
- **Playback Wing 4**
- **MiniWing 4**
- **USB DMX Super Duper Widget**
- **Master Wing 4**
- **Playback Wing 4**
- **MiniWing 4**
- **USB DMX Super Widget**
- **USB MIDI/LTC Widget**
- **Hog 4 Full Boar**
- **Road Hog 4**
- **HedgeHog 4X**
- **HedgeHog 4**
- **Hog 4 PC with Hoglet 4**
- **Master Wing 4**
- **Playback Wing 4**
- **MiniWing 4**
- **USB DMX Super Duper Widget**
- **Master Wing 4**
- **Playback Wing 4**
- **MiniWing 4**
- **USB DMX Super Widget**
- **USB MIDI/LTC Widget**
- **Hog 4 Full Boar**

### Specifications:
- **DMX Outputs:** 8,000
- **Master Wing:** 4
- **Playback Wing:** 4
- **MiniWing:** 4
- **USB DMX Super Widget:** 12 with LCD
- **USB MIDI/LTC Widget:** 12 with LCD

### Other Products:
- **Master Wing 4**
- **Playback Wing 4**
- **MiniWing 4**
- **USB DMX Super Duper Widget**
- **Master Wing 4**
- **Playback Wing 4**
- **MiniWing 4**
- **USB DMX Super Widget**
- **USB MIDI/LTC Widget**

Hog 4 thinks in real-world units – just like you. Positions are stored in degrees, gobo rotations in RPM, effects in BPM – you name it and Hog 4 keeps track of it logically.

What happens on tour changes on tour. Because all of the data is stored in real-world units, Hog 4's Change Type function means swapping fixtures is a quick, painless, and most importantly accurate operation.

A Hog 4 for every gig

With a wide variety of hardware sizes, Hog 4 scales perfectly from a massive international stadium tour to a small club, corporate event or studio space. The Hog 4 OS and programming section remain consistent across the range, making for efficient and consistent programming on every show.

The flagship Hog 4 is designed for the largest shows, concert tours, and theme park attractions. Programmers will power through cueing sessions with integrated 17” touchscreens, high-resolution encoders, jog-shuttle wheel with dedicated touchscreen, LCD keys and motorized faders.

Hog 4 also features integrated storage compartments, pull-out QWERTY keyboard, and level/rate wheels.

The Full Boar 4 is versatile enough to handle everything from a corporate show to an EDM festival. Full Boar 4 features two integrated 15.6” touchscreens as well as supporting two external touchscreens. Full Boar 4 satisfies the demanding programmer, and brings the package in on budget.

Road Hog 4 strikes the perfect balance between performance and economy. The programming interface remains familiar, and the Hog 4 OS lets the user transition across the whole range without sacrificing workflow.

Programmers love the 22”, high-resolution touchscreen with ample space for customized screen layouts. One additional external touchscreen gives the perfect amount of control without breaking the bank.

HedgeHog 4 consoles might be small, but they pack a serious punch! Built for travel, these consoles are compact and lightweight – perfect for new users and smaller venues.

School theaters, nightclubs, corporate events, medium-scale rental events and houses of worship are the HedgeHog 4's natural habitat.

The Hoglet 4 is a compact wing, designed for tight spaces and small productions such as clubs, churches and small concert venues. Combine the Hoglet 4 with Hog 4 PC and you are ready to rock!

Even a seasoned Hog programmer will feel right at home on the Hoglet 4, as it has a programming surface similar to its larger brothers.

Rack Hog 4 has all the power of a Hog 4 console in a 3U 19-inch rack mount unit – perfect for fixed installations, cruise ships, theme parks, and architectural lighting features.

Rack Hog 4 can also act as a backup to any console in the range.

DMX Processor 8000 (DP8K)

DMX Widgets allow you to quickly expand your Hog's DMX output. DMX Widgets add one, four, or eight universes. The MIDI/LTC Widget provides LTC input and MIDI in/out/thru for any Hog 4 OS console or Hog 4 PC.

Wings help your pig fly! The Master Wing 4 provides up to 30 additional motorized playbacks, plus physical memory when using Hog or Widgets. As integrated 15.6” touchscreens allow you to expand your work surface fluidly.

The Playback Wing 4 provides ten additional motorized faders and one Grand Master, all motorized. Like the Master Wing 4, the Playback Wing 4 features an integrated 15.6” touchscreen.

The free Hog 4 PC software brings the functionality of Hog 4 to your personal computer. Edit show files offline, or connect as a networked client. Alternatively, add a Hoglet 4 or a Widget, and run as a compact stand-alone controller.
