

OVERVIEW

HedgeHog 4 consoles might be small but they pack a serious punch! Built for travel (even on a plane), these consoles are compact and lightweight perfect for new users and smaller venues. School theaters, nightclubs, corporate events, medium-scale rental events and houses of worship are the HedgeHog 4's natural habitat. HedgeHog 4 consoles share the same programming layout and capability as their larger brothers, and can happily load show files from any console in the range.

There are two models: the base-level HedgeHog 4 and the expanded HedgeHog 4X. Both have an internal 12.1-inch multi-touch monitor, ten faders and four encoder wheels. The 4X has expanded networking capabilities and increased output capacity out of the box, while HedgeHog 4 users can perform a software update to unlock the 4X features at a later date. As a bonus, all HedgeHog 4 and 4X consoles include a license-free version of LIGHTCONVERSE visualization software.
