

-
- 9.** Position the drilling template over the side cover and attach with the screws you saved.

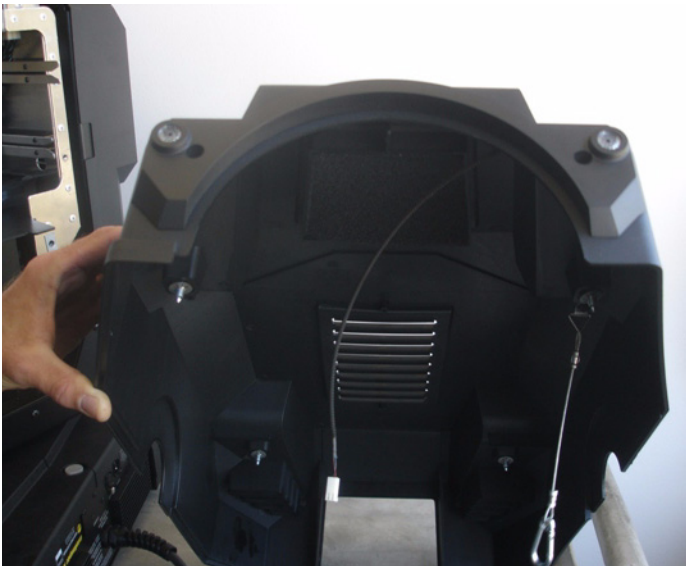

Using the bit provided, drill a 5/16 in hole in through the template into the cover on the safety cable side.

-
- 10.** Remove the template and save the screws.

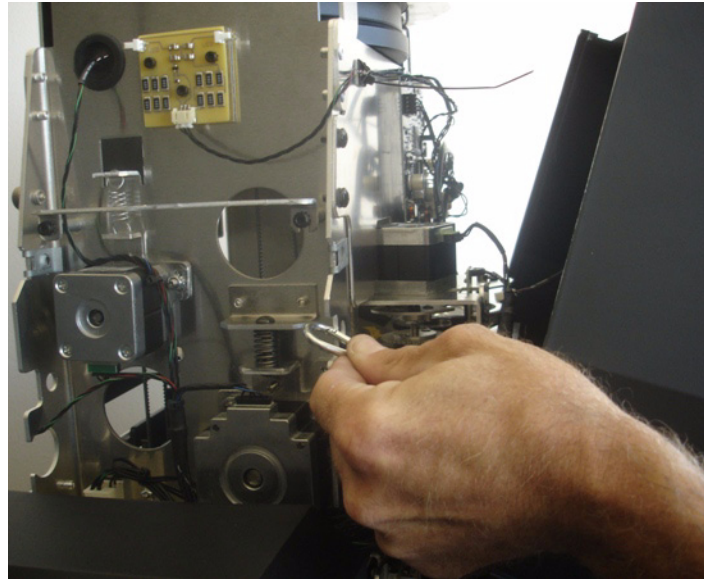

-
- 11.** Position the new lens protector, threading the cable through the hole you just drilled.

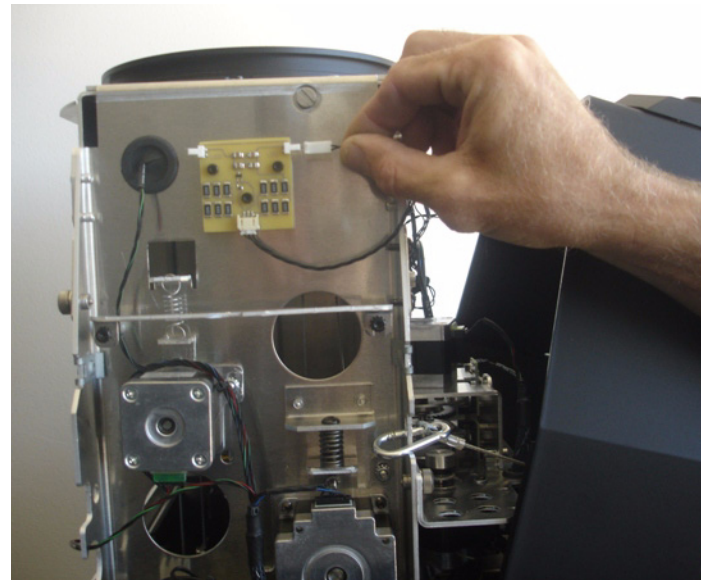

-
- 12.** Use the screws to install the new lens protector containing the Indigo Highlighter LEDs to the side cover.

Replacing the side covers

- 13.** Re-connect the safety cable to the unit.

-
- 14.** Attach the LED cable to the closest side of the Indigo Highlighter control board.

-
- 15.** Attach the side cover to the unit by tightening the 4 captive screws.
