NOTES

- 1 Continuous mode should take quickest path from 255-0, and 0-255.
Continuous mode color wheel aperture centers

Color	Center of color DMX value
Open	0
Red	32
Blue	64
Green	96
Yellow	128
Orange	160
Magenta	192
Congo Blue	224

- 2 63 Discrete multi step LED animations to be defined later. These will require macro speed and x fade channels.
The macros will operate independently. The Xfade and speed channels act as multipliers of the programmed speed in the discrete macro steps.

Speed / X fade channel operation

- 0 stops playback or crossfade
- 1-127 decreases playback speed / crossfade time (* <1)
- 128 playback or cross fade speed is as programmed (*1)
- 129-255 increases playback speed / crossfade time (* >1)

- 3 Fan control modes are not retentive. When the fixture is turned off it will default back to Standard mode.
